

04 – Project Planning

Client Script & UI Policy in ServiceNow Incident Management

Technology Track	ServiceNow Administrator
Module	Incident Management
Project Approach	Phase-wise planning and implementation

1. Planning Objective

The project plan defines the activities required to complete the ServiceNow Incident Management project in an organized, phase-wise manner. The plan covers configuration, development, testing, documentation, and demonstration.

2. Project Work Plan

Phase	Major Activity	Planned Output
01	Brainstorming & Ideation	Project idea, objectives and proposed solution
02	Requirement Analysis	Functional and non-functional requirements
03	Project Design	System design, workflow and UI design
04	Project Planning	Task plan and responsibility tracking
05	Project Development	Client Script and UI Policy implementation
06	Project Testing	Test cases and test results
07	Project Documentation	Final project documentation
08	Project Demonstration	Demo video and demonstration material

3. Development Task Plan

Task ID	Task	Responsible Member	Status
T01	Review project requirements	Team	Planned
T02	Configure Incident form	Team	Planned
T03	Configure Client Script	Team	Planned
T04	Configure UI Policy	Team	Planned
T05	Verify dynamic field behaviour	Team	Planned
T06	Capture implementation screenshots	Team	Planned
T07	Prepare test cases and results	Team	Planned
T08	Prepare final documentation	Team	Planned
T09	Record project demonstration	Team	Planned
T10	Upload final files to GitHub	Team	Planned

4. Responsibility Plan

- M Manisha – Team Leader: coordinate the project activities and final submission.
- M Monisha – Member: support ServiceNow configuration and documentation.
- E Pattu Devi – Member: support testing and result recording.
- S Selva Abi – Member: support development activities and screenshots.

- M Sree Varshini – Member: support documentation and demonstration preparation.

5. Milestone Plan

Milestone	Expected Completion Point
Planning Complete	Project phases and tasks identified
Development Complete	Client Script and UI Policy configured
Testing Complete	Test cases executed and results recorded
Documentation Complete	Final project documents prepared
Demonstration Complete	Demo video recorded and link prepared
Submission Complete	Phase-wise files uploaded to public GitHub repository

6. GitHub Submission Plan

- Maintain the project phase-wise in the GitHub repository.
- Upload project documents, diagrams, screenshots, configuration details and testing evidence.
- Keep the repository public for submission.
- Maintain the demonstration video link in the Project Demonstration phase.

7. Team Members

Role	Name
Team Leader	M Manisha
Member	M Monisha
Member	E Pattu Devi
Member	S Selva Abi
Member	M Sree Varshini

8. Planning Outcome

The project plan provides a structured path for completing the ServiceNow Client Script and UI Policy project from development through testing, documentation and final demonstration.
